

The Universidad de La Sabana logo has two responsive applications: vertical and horizontal. In both cases the minimal sizes it can be used is when the hight of the symbol is 8 mm or 22 px.

Right usage of the logo, with institutional colors

If the piece where the logo appears is in color, it may only be used in two ways: blue, if there is sufficient contrast, or white. The white version allows the logo to be placed over backgrounds of different colors and shades.

Co-branding

The university logo must always be placed at the top, bottom or left edge of the piece, with a dividing line between the brands. The university logo may be in blue or white. The size of the brands should be similar.

For third-party use of our logo, any of these four versions may be used. It is importante that it is used only in dark blue, white or black if needed.
